

NET ZERO PLEDGE

Axis Nursing Agency

Our company wishes to join the growing group of leading companies that are setting emissions reduction targets in line with Science-Based Targets. By doing so, we recognise the crucial role the business and community can play in minimising the risk climate change poses to the future of our planet.

We **{Axis Nursing Agency}** commit to develop a science-based target aligned with the SBTi criteria, submit the target to the SBTi for validation and publish our approved targets within a maximum of 24 months.

- We commit to reducing our Scope 1 & 2 GHG emissions by 50% by 2030 from the Base Year below and 100% by 2050.
- We commit to measuring and reducing our Scope 3 by engaging with 80% of our supply chain by 2026.
- Scope 3 emissions to be reduced by 100% by 2050 or sooner.

We will complete the above by implementing the following:

- A Net Zero Carbon Action Plan
- Engage with 80% of our Scope 3 supply chain by 2026
- Monitor and track our carbon emissions monthly via CarbonFIT.
- Implement the recommended actions & projects to start reducing emissions immediately
- Review our management policy to ensure responsibility is delegated and actions monitored
